Why now?

The internet is certainly part of our lives. We use the Internet for banking, work, social interaction, shopping and much more.

However, scams, hacks, theft, bullying, trolling, dangerous 'trend setting', misinformation, radicalisation and many more dangers exist on the internet.

90% of adults in the UK are recent internet users

What next?

Remain vigilant for anyone in need of support or safeguarding in relation to internet safety. **Begin a conversation!** We can offer guidance and signposting support to those we come into contact with.

'Make space for conversations about life online'

It's never too early or too late to start an online safety conversation.

Radicalisation is the **top methodology** used to groom people towards terrorism in Nottingham and Nottinghamshire.

The greatest threats in our area are from Self-Initiated Terrorists – often inspired by online groups but not directed by them and while we've seen an increase in Extreme Right wing rooming and violence the threat from Islamic State or Al Quida inspired terrorists remains significant in the region. If you are concerned about someone being drawn into radicalisation online please contact the police Prevent team on 111 and ask for Prevent or look at the resources here for more information:

Theme: **Radicalisation**

Theme: **Exploitation**

Criminals are taking advantage of the increasing amount of time people spend on the internet to groom and exploit people. NCC's Slavery Exploitation Team reports an increase in targeting young people via Snapchat to get involved in criminal exploitation, and instances of blackmail when threats are made of revealing personal information unless payments are made.

Theme: **Dangerous Trends**

Online trends can be 'incredibly dangerous'. Some online trends (challenges) can be life threatening and have caused recent fires, physical harm, and fatalities.

Theme: **Personal Safety**

- 25% of people say they don't make appropriate checks online:
- Use strong (different) passwords
- Be aware of your privacy settings
 - Take care with friend requests
 - Don't overshare information (keep information private)
 - Do not share your whereabouts
 - Be mindful of clicking on links / attachments
